Capability Statement

Founded in 2023 by Cameron Dunn and Sheridan Manuel, CDSM Civil Infrastructure brings together extensive experience in the plumbing and civil construction industries to provide end-to-end solutions for Principal Contractors seeking a reliable partner.

Holding all relevant licences, we deliver comprehensive civil construction services including demolition, earthworks, stormwater infrastructure, pavements, and commercial plumbing.

Our dual-trade capability allows us to offer integrated solutions for building projects, enhancing efficiency and quality.

At the core of our business is a team-oriented approach. We prioritise long-term relationships with clients, subcontractors and supply chain partners, ensuring projects are delivered on promise and on program.

Our commitment to reliability, capability, and continuous improvement positions CDSM Civil Infrastructure as a trusted and preferred partner in the industry.

Our key capabilities include:

- Demolition
- Bulk and Detailed Earthworks
- Inground Services
- Commercial Plumbing
- Stormwater Infrastructure Installation
- Pavements
- Construction Management
- Plant Hire

For assistance with your next project, please contact us to discuss how we can deliver reliable, professional solutions tailored to your needs.
